

# Amplifier

Ottocanali 4K4 is a 8 channels class D power amplifier usable with Step-Array series with 6 channels amplifiers (SA250 - SA400) or subwoofers.

The 8 channels can work with different loads above 2 Ohm or in 100V line. Mixed configuration can be made.

When important power is needed to drive subwoofer for exemple, the amplifier can work in bridged mode.

Dedicated to fixed installation, Ottocanali has an important efficiency. The electric consumption and the heat dissipation is weak compared to the output power.

The protection against over/under voltage, clipped signals,VHF emissions, and short Circuits make the amplifier reliable.

Ottocanali 4K4 is equipped with GPI connector for external VCA volum control and alarm GPO connectors. An ethernet port makes the control by external device possible.

Ottocanali 4K4 exists with an integrated DSP processor and Dante Input under the reference Ottocanali 4K4 DSP+D.

Ottocanali 4K4 DSP+D will offer a 8 x 8 matrix or all analogue and digital inputs. Integrated in the DSP will offer filters per channel offering aised-cosine, custom FIR, parametric IIR, peaking, hi/lo-shelving, all-pass, band-pass, band-stop, hi/lo-pass filters and a crossover linear phase (FIR), Butterworth, Linkwitz-Riley, Bessel: 6 dB/oct to 48 dB/oct(IIR).

For time alignment the DSP in the amplifier will offer Delay 2 s (input) + 100 ms (output). The limiters in the DSP will contain TruePower™, RMS voltage, RMS current and Peak limiters. Active DampingControl™ and Live Impedance™ measurement will be part of the DSP.
