# For Testing the Wiring Condition of 3-Phase Receptacles and Connectors

- Quickly diagnose miss-wiring situation or application
- Great for dark, difficult to reach spaces
- No measurement readings to interpret

The Hubbell Twist-Lock® 3-Phase Tester is an exclusive patented design that easily tests the circuit condition without the need for traditional measurement techniques. Whether it is a contractor, electrician, or entertainment stage crew, knowing that power is present at any receptacle or connector is critical. By plugging the tester into a 3-phase outlet, an LED output will immediately provide the state of the circuit.

An easy to read card is provided with the tester, to help determine if the connections are made properly and in the correct position. This unique NEMA configuration ensures that the proper connection was made through an easy to read output display. It also easily attaches to a tool belt so it is available when needed.

#### **APPLICATIONS**

Industrial

Temporary Power

Medical

## HUBBELL

### Twist-Lock® 3-Phase Circuit Tester

#### **FEATURES**

- L21-20, L21-30 style available
- Easy to read LED output and condition tables
- Insulgrip® nylon housing for secure gripping
- Carabiner style clip to secure to work belt
- UL 1436 listed

#### **SPECIFICATIONS**

- Nylon Housing Assembly
- Brass Blades
- Assembly Screws Steel (nickel plated), Tamper-Proof

#### **ORDERING INFORMATION**

TWIST-LOCK® 3-PHASE CIRCUIT TESTER			
Description	Rating	20 Amp NEMA L21-20	30 Amp NEMA L21-30
3-Phase Circuit Tester	3Ø 120/208V AC Min. Voltage: 90V AC	HBL3PT2511	HBL3PT2811

#### **CONDITION TABLES**
